- Reactivo
- Vue.js core → UI
- Componentes
- Fácil de aprender
- Vue.js + herramientas + librerías = SPA

User Input

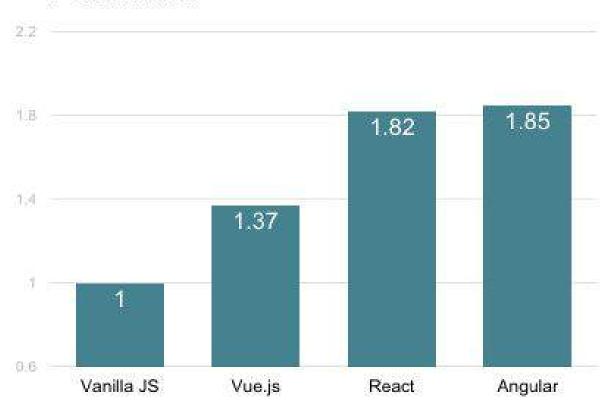

http://stefankrause.net/js-frameworks-benchmark4/webdriver-ts/table.html

Similitudes

- Virtual DOM
- Componentes
- Librería core sólo para la Ul

Performance

- Minimizar las interacciones con el DOM
- Minimizar los cálculos de JavaScript para saber qué modificar

Update performance

- shouldComponentUpdate y estructuras de datos inmutables
- Dependencias auto-trackeadas

Developer Experience

HTML

React = JavaScript everywhere (JSX)

```
render () {
 let { items } = this.props
 let children
 if (items.length > 0) {
   children = (
     {items.map(item =>
         key={item.id}>{item.name}
       )}
     } else {
   children = No items found.
 return (
   <div className='list-container'>
     {children}
   </div>
```

HTML

Vue.js = templates

Vue.js vs React CSS-in-JS

```
1. const styles = {
2. 'btn': {
'display': 'inline-block',
 4. 'border': '0',
5. 'padding': '6px 12px'
6. },
8. 'btn primary': {
9.
    'color': '#fff',
       'backgroundColor': '#f74A27'
10.
11. },
12. 'btn primary hover': {
       'backgroundColor': '#ff7857'
13.
```

Component-Scoped CSS

```
<style scoped>
  @media (min-width: 250px) {
    .list-container:hover {
       background: orange;
    }
  }
</style>
```

Component-Scoped CSS

```
<style scoped>
  @media (min-width: 250px) {
    .list-container:hover {
      background: orange;
    }
  }
</style>
```

Redux \longleftrightarrow Vuex

React Router ←→ **yue-router**

Vue.js vs Angular

- TypeScript
- Performance y tamaño
- Flexibilidad
- Curva de aprendizaje
